

ABSTRACT

An article and a method of forming an article,  
for example formed of plastics, confectionery product,  
5 soap, wax or liquid, by determining the intensity of  
different points of an original image, and forming the  
article with a thickness at each point of the article  
related to the intensity of the corresponding point of  
the original image. Preferable, the article is formed  
10 by forming a mould, and moulding the article.
